MEDIA RELEASE

GreenClinic LifeScience Global, EVIM International Project, Tallinn, 25.01.2017

EVIM, The Electric Vehicle and Infrastructure Meeting is coming to Kyiv

The international summit EVIM East Europe – 2017, a part of EVIM, Electric Vehicle and Infrastructure Meeting, a platform bringing together e-mobility, renewable energy, sustainable infrastructure and architecture in the aim of common development.

The summit is intended to discuss and define the ways of upgrade the transport technology with the electric mobility.

To solve the problems of the cost of fuel, impact of smog on people's health, noise and vibration, to get better background of economic growth by introduction of private, public and cargo electric mobility joint and integrated together with renewable energy into the architecture of existing infrastructure of settlements and economy, are also goals of the summit.

At the spring, on the 29-31 of March 2017, this event will take place in Kyiv, Ukraine, with the motto "Shaping the mobility", to share the experience, promote progressive technologies and the best practices, improve new common vision and development policy for the sustainable transport industry in Ukraine and CEE region (Central and East Europe) for the entire next year.

most dynamically developing, first of all, based on the stable organic demand. Well-developed road network (approximately 163 027.6km), a high level of urbanization, suburban inhabitants highly involved into a big cities economies, a strong energy system with great availability of overproduced night energy, high tempos of development in renewable energy sector, high prices for traditional fuel and open-minded customers with a positive attitude to innovations and personal independence from purchase of fossil fuels, - together creates a promising background for development of electric mobility and charging infrastructure already today.

The summit dates from the 29th to 31st of March 2017 will be fulfilled by exciting speeches and discussions, professional communication and networking of decision makers, presentation program of startups and scientific achievements, and experience exchange EVIM Youth Program with traditional pro-bono speeches of EVIM participants and guests in prominent educational institutions, and also an amazing live art project.

EVIM East Europe - 2017 is also connected by cooperation and common location with the partner exhibition InterBuildExpo 2017 – one of the largest construction exhibitions of the East Europe region paying great attention to the renewable energy, sustainable architecture and infrastructure (March 29 - April 1).

So, wherever you are, save these dates and join the changes!
