EVIM 2018: updating EV reality

EVIM 2018: III New Mobility and EV Summit for Central and Eastern Europe is taking place in **Kyiv, Ukraine on March 1-3, 2018.**

This spring for the 3rd year in a row EVIM holds this unique three-day event, world's one of the most important electric vehicles and new mobility summits dedicated to **Central and Eastern Europe**. Again Kyiv becomes the centre of dialogue on e-mobility, new sustainable transport and infrastructure for CEE region. Moreover EVIM Summit as one of the key and the most dynamic EV events is creating a space for business communication and building the long term partnership.

EVIM participants, Central and Eastern Europe representatives, come to Kyiv to unite a huge area from Baltic Sea to Balkans into one **EV-without-boarders region**. Automotive experts, charging infrastructure developers, environmentalists, software specialists, architects, alternative energy engineers, EV and sustainable business representatives gather to define a road map for sustainable mobility industry in the countries of the region.

The program of the summit will contain plenary and panel sessions, presentations, exhibition during the summit, test drives, start-ups and research programs, program for designers, book presentations, art project, youth program and many other.

The second day of the event will be held in a partnership with **EcoDrive exhibition** in Kyiv. This cooperation brings to the participants of both events a great opportunity to learn and observe more on the EVs, sustainable and active mobility, getting new exciting experience on test drives. The third day of the summit is **SSIDD Conference 2018 Kyiv** dedicated to the development of sustainable city infrastructure which is human and nature friendly. The best practices, projects implementation, and engineering solutions for urban planning and city development will be presented.

The EVIM is continuing updating reality of EV and new mobility in CEE region, starting from the **first EV Summit in Ukraine** the EVIM Ukraine 2016, which has become a breakthrough point for electric mobility of Ukraine and Poland, engaging more EV enthusiasts and businesses from both countries to act more confidently. The tradition was continued to Warsaw, Poland in autumn 2016 and in Kyiv, Ukraine in the spring of 2017 where EVIM EV Summit was held again with the numerous of participants and guests from several countries of the world.
